DETAILED ACTION

Content of Specification

- (g) Brief Description of the Several Views of the Drawing(s): See MPEP § 608.01(f). A reference to and brief description of the drawing(s) as set forth in 37 CFR 1.74.

Allowable Subject Matter

1. Claims 1-9 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, the prior art does not disclose or fairly suggest an arrangement which includes light-sensitive or X-ray sensitive sensors arranged in a matrix where each sensor comprises of two transistors connected in series.

The examiner notes that while it is known in the art for a light-sensitive matrix-arranged sensor to comprise of a photosensor element connected parallel to the terminals as well as with a respective transistor (see for example *Meulenbrugge -- US 5,194,736 A*-- See Generally Figs. 1-3 and col. 4, lines 25-30, 40-51 and col. 1-11), the prior art does not fairly suggest each sensor comprising two transistors to connect in a series.

The remaining claims are allowable based on their dependency.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
